AMERICAN COIN SCALE.

The small, but very choice collection, herewith offered, possesses the unusual merit of being formed almost entirely of extremely fine or uncirculated SILVER COINS of modern nations, of the largest denominations, of medals of exquisite workmanship and intrinsic as well as artistic value, and of a few fine specimens of Ancient Coins, chiefly Greek Tetradrachms.

The catalogue therefore embraces, in its well-filled pages, a large number of those beautiful, rare, and desirable coins, which add interest and value to every collection, and for this reason especially, even although in the midst of rapidly recurring coin sales, the compiler does not hesitate to offer the collection for public competition, only asking collectors, into whose hands this catalogue may be placed, to give its pages a careful examination, assuring them also that, no matter what the cost of any single specimen may have been to its present owner, everything therein contained will be sold to the highest bidder, without any reserve whatsoever.

☞ *Fifty copies of this Catalogue, printed on heavy paper, and illustrated with 3 heliotype plates, are now for sale at 50 cents each, a price list to be furnished without extra charge, immediately after the sale, or the illustrated catalogues will be sent after the sale, priced, at the same price.*
